

Resolution of the

Sarasota Freedom Lovers: SarasotaFreedomLovers.com

Preamble:

The Sarasota Freedom Lovers is a private membership association that assembles weekly to discuss, and educate ourselves, on a multitude of topics pertaining to FREEDOM.

We believe, and are in fact certain, that all sentient beings are bestowed with the Natural Rights to Life, Freedom, The Pursuit of Happiness (which includes the right to be secure in our property), and many additional rights based on Natural Law.

These rights have been elucidated many times over the past couple of thousand years and are guaranteed by documents such as the Magna Carta & Constitution for the united States of America. The bottom line is that the great experiment we call the united states of America is based on the acknowledgement that we are each sovereign living & breathing beings.

Contrast that to the way our so-called 'government' operates. It is composed of surrogate service providers that have run amok enslaving the populace by tricking them into inadvertently gave up many of their natural rights via various fraudulent entrapments through implied agreements, contracts, and hidden trusts in particular.

We are AWAKE and We do not accept the suppression of our freedom, natural rights, and indigenous power. As an assembly of awakened, living men and women, we have also chosen to work on several pressing issues.

We are working to establish a Sarasota County & Florida State Assembly and Grand Jury system. This project will take some time to perfect, however, it will facilitate the ability of the people to better direct and impact our elected and/or appointed officials, i.e., our employees, to carry out our will.

In the meantime, we have another cause that we will be focusing our resources on. Fixing or minimizing the Red Tide problem by reducing the ongoing pollution of our waters by Phosphate mining & fertilizer runoff.

Resolution:

We hereby resolve that we have examined the data pertaining to Red Tide and the factors that exacerbate it. We have **concluded that Phosphate Mining is by far the biggest contributing factor to this problem.**

We therefore call for **the complete halt of all Phosphate Mining in Florida by the end of 2021.**

Mosaic is the primary company responsible for carrying out phosphate mining in Florida and it is therefore responsible for extensive damage and harm to both life, property, and the environment.

Red tide is just the tip of the iceberg. Phosphate mining unearths huge amounts of radiation and releases it into the air, water, and soil with devastating health effects.

Mosaic is well-aware of the problem and the death and destruction that their mining practices continue to cause. They have systematically worked to cover these facts up and to aggressively lobby local and state politicians to look the other way with various political contributions and other methods of influence.

We believe that Mosaic is guilty of massive crimes against humanity, the environment, wildlife, and the economy of our state.

We call on ALL elected and appointed officials to uphold their Oaths of Office. Those Oaths typically include protecting the people and the environment, as well as upholding the Constitution.

Anyone that supports or allows for continued Phosphate Mining is NOT honoring their Oath of Office and we will work to remove them and hold them personally liable. By not honoring one's oath, they lose any protections afforded by their office.
