

## What is REALLY Going ON?

Is This Really a Pandemic caused by a 'novel' Coronavirus or is it a Scamdemic/Plandemic (aka Planned-epidemic) or has the whole thing simply been MISDIAGNOSED?

This is the Super-condensed version of the research I've been doing for the past 16+ months combined with what I've learned over the past 45 years as a physician, truth-seeker, and contrarian. My motivation was simply to figure this out since the constantly shifting 'official narrative' makes no sense. In cases like this, the barrage of BS and confabulations create a great deal of cognitive dissonance that compels me to do my best to figure it.

By The Nutrition Ninja Doc aka Max MacCloud, DO, ND, PhD

Before I begin, I must ask you a few important questions. Do you believe that everything being told to us by the 'authorities' in charge, is the truth to the best of their knowledge? Might they be spinning what they are telling us for various reasons? On the other hand, do you believe that they ACTUALLY KNOW what is going on? Do you trust their competence or ability to be completely objective?

Sadly, experience has taught us, at least those that know the history, that all of the above questions can only be answered in the negative. i.e., We cannot believe that those in charge are telling the complete truth as to what they know (or think they know) and are likely spinning what they believe to fit their perspective and narrative. WE likewise cannot and should not believe that those same 'authorities' actually know what is going on as we absolutely cannot trust their collective competence and ability to be objective.

If you believe that the authorities actually KNOW exactly what is going on and that they are telling the complete truth as to what they know, you might as well skip this as there's little hope that you'll 'get' the message anyway.

The story being told, and changing a bit daily, began with an outbreak of a 'new & different appearing' respiratory syndrome or pneumonia in China back in December. It was soon determined to be an atypical viral pneumonia due to a 'novel coronavirus' named SARS-CoV-2. It 'appeared' to spread to other countries and was eventually designated as a pandemic by The World Health Organization.

**5/21 update:** The plethora of false & manipulated data has continued unabated. Censorship has reached a peak that may actually exceed that of Nazi Germany and the Communist regimes of Russia and China.

Many groups have organized in attempts to combat this, however, lacking a functioning crystal ball means that they are making best guesses and are very subject to positive bias.

Here are a few things that we can be pretty certain about:

1. The so-called novel corona virus named SARS CoV-2 has yet to be isolated!
2. Since there is no isolated virus, there can be NO Valid test for the virus.
3. With no valid test, there can be NO confirmation of either cases or deaths blamed on the virus.
4. No antibodies have been identified for the SARS CoV-2 virus.
5. No antibodies means there can be NO legitimate vaccine for the virus.
6. Although over 600,000 deaths have been attributed to 'the virus,' there has been NO increase in total deaths. Interestingly, there has been almost a complete elimination of deaths associated with the yearly flu.
7. Since neither the virus, a test for the virus, antibodies to the virus, nor a vaccine for the virus have been VERIFIED to exist, WTF is all the fuss about vaccinating the world? Does any of this make any sense?

**As of 7/7/20,** they have shifted from emphasizing deaths to emphasizing 'cases' over the past couple of weeks. Of course, they are finally doing A LOT more testing which will show more positives, however, does it really mean anything? NO, it doesn't, here's why. The tests being used are all based on PCR technology (Polymerase Chain Reaction). The inventor stated when he invented this technology and holds with that statement today that PCR CANNOT be used to diagnose anything. It is a research tool and does not, and cannot, identify a specific virus.

Now, on top of that, they also admit that the tests have a 50-80% FALSE POSITIVE rate and you SHOULD begin to see a problem here. PCR is being used to diagnose something that it isn't specific enough to do. What it is doing is confirming that a person has a RNA or DNA sequence similar to what they are looking for. That means it will be legitimately positive in just about anyone with exposure to one of the several coronaviruses that are able to infect humans.

It also means that it will designate 50-80% of those tested as positive when they are actually negative! Does anyone else see how utterly insane this is?

Additionally, yesterday the head of the Bulgarian Pathology Association stated that they have NOT been able to find ANY antibodies to this supposedly novel coronavirus. These are called monoclonal antibodies. Without monoclonal antibodies it is impossible to even begin to develop a vaccine. Additionally, he believes that it is not even possible to develop a vaccine for this type of virus due to its constant and high rate of mutations.

ON TOP OF THAT, he pointed out that there is not a single confirmed death due to SARS-Cov-2 (COVID-19) in all of Europe. However, WHO, and their aligned agencies have directed and pushed physicians to label huge numbers of deaths as caused by Covid-19. We have many similar reports of pressure from the CDC and other agencies doing the same thing in the US.

Additional new data confirms that huge numbers of tests have been double counted as positive. The real number of infections could be as low as ZERO. The real number of deaths due solely to Covid-19, likewise, could be as low as ZERO.

There's something really fishy going on and it isn't the Live Food Market in Wuhan!

As of 4/29/20, an estimated 3.2 million people have been 'designated' as infected with 227,000 that have been 'designated' as dying due to this 'new' virus and the syndrome it causes, now called Covid-19. I was going to say that that is really all that we know for sure, however, the reality is that we don't even know the accuracy of that data. The initial discovery was based on about 35 cases that were 'atypical' pneumonias in a huge city of 11 million that typically has 50,000 to 130,00+ cases of pneumonia each flu season. The entire premise that this 'strange presentation of a respiratory problem leading to what appeared to be pneumonia in some, has numerous holes in it. Perhaps one of the biggest obstacles has to do with HOW the 'novel' virus was discovered or diagnosed and determined to be what they say it is, since the testing being utilized is PCR (polymerase chain reaction). The developer of PCR testing, Kary Mullis, PhD, has said from its inception that PCR CANNOT be used for diagnostic purposes. It is useful for a number of things related to research as it is able to greatly magnify the number of various strings of RNA or DNA thereby making them easier to potentially identify the presence of certain viruses. However, even that is not all that certain as many viruses in the same family have many RNA or DNA sequences (as the case may be) in common. PCR cannot distinguish between viruses that are very similar that well. Therefore, by beginning this entire inquiry based on a preconceived notion that it was due to a 'novel' coronavirus led to a long slog down a rabbit hole that may have nothing to do with the real cause of this entire 'pandemic' (or plandemic as some have called it.)

Something 'new & different' DOES appear to be killing people. Based on the current information available, it is difficult to determine whether there is a significant increase in the total number of people dying or if there has merely been a shift in the way these deaths have been classified. There is significant speculation based on MANY independent reports that the number of deaths due to 'Covid-19' (which may not even be due to the SARS-CoV-2 virus at all) are being extremely inflated to serve some other agenda (creating fear and crashing the global economy appears to be the primary agenda at this point). Based on the MSM (Mainstream Media) reports, it appears that significantly more people are dying than would be expected to die this time of year but this may not be the case at all. Personally, I do believe that more people are dying but I do not believe that it is due to a 'novel' virus at all. I'll discuss the factors

that I believe are driving this shortly. Whichever the case may be, it has now been designated as a Pandemic by The World Health Organization aka WHO.

The 'powers-that-be' (WHO, Chinese CDC, US CDC & NIH, and European equivalents, etc.) have determined that the pandemic is due to a 'novel' version of the coronavirus designated as SARS-CoV-2, however, this is far from proven. By the way, there are over 500 known strains of coronavirus only about 7 of which infect humans. They account for approx. 25% of what causes the common cold.

This 'new & different' cause is primarily targeting the weaker members of society, the elderly, those with chronic diseases, compromised immunity, cardiovascular, respiratory, and metabolic diseases as well as smokers, the obese, and those with hypertension. Although some of these certainly fit the pattern for a microbial or viral pathogen, there are also a number of abnormalities including: largely sparing the young (whose immune systems are typically not fully developed and therefore more prone to new viruses) and killing a significantly higher percentage of men than women. There are also reports of some blood types being infected more than others.

The presentation of signs and symptoms, as well as the progression of this syndrome, is also unusual and unlike any viral pneumonia we've seen before.

There are several mysteries associated with this pandemic that have not been explained by the current 'theory' that says it is due to a 'novel' coronavirus.

Science, logic, and common sense all dictate that additional theories of the etiology (cause) should continue to be explored and discussed until we have a much better understanding of the causal agent(s) and mechanism(s) by which people are dying.

Our authorities in charge, including the above-named organizations, the medical profession at large, and the governments of the world, have all failed miserably to properly explore other potential theories of causation. Instead, everyone has kowtowed to the WHO, which is a political organization operating as a pseudo-scientific/medical organization with a long history of VERY questionable actions.

Additionally, many governments have made numerous STUPID responses that have rapidly led to a global financial catastrophe of unprecedented proportions. Their actions are largely irrational and based on very dubious speculations from completely biased and flawed data, all based on an unproven theory. While I'm all for erring on the side of caution, it must be tempered with logic, commonsense, and actually looking at the data. The inappropriate responses will ultimately lead to more death, pain, and suffering from the actual pandemic itself based on numerous analyses.

Much of the response has been so egregiously stupid as to make this whole situation appear to be much more of a "Plandemic" or "Scandemic" than a true Pandemic.

\*An opposing theory: This pandemic is actually the result of the confluence of several major factors that have created an extremely overstressed and weak population. We are the weakest, sickest human population that has ever existed on the planet for multiple reasons. The factors that are associated with and have contributed to our sick, weakened state include the following. Please note that there are many books and scientific papers backing up the validity of every one of these factors. Also note that there are alternative ways to categorize the various factors presented, this is just how I've chosen to do it based on my training and background.

1. **Toxins & Pollution:** We have spewed tens of thousands of toxic substances into the environment with impunity for the past 100+ years. These toxins and pollutants are well-documented to impair health and the immune system.
  - a. **Particulate Matter (also referred to as PM 2.5)** appears to be of particular concern and shows some direct correlations with the 'hot spots' for the 'pandemic' deaths. PM 2.5 HAS to be considered in any 'pandemic' that impacts the respiratory system.
  - b. **Glyphosate (aka Roundup)** appears to be another major factor contributing to the significant increase in numerous serious health challenges over the past few decades. It is a MAJOR problem as it disrupts the ability of plants to make 3 ESSENTIAL Amino Acids AND it is water soluble thereby getting into our water supplies.
2. **Extreme Psychological Stress:** This has been building for decades and has accelerated the past several years as technology & 'screens' have replaced real-life, personal contact and communications. People have increasingly lost physical contact with other humans.
3. **Drugs (both illicit and prescribed pharmaceuticals):** A high percentage of 'the masses' have been 'self-medicating' with a wide array of both illegal, mind-altering substances and legal medications, in attempts to 'change their psychological state' and alleviate their discomfort & stress. The medical profession has become salesmen for Big Pharma, prescribing a huge amount of a variety of harmful medications that DO NOT fix ANYTHING.
4. **The Complete Failure of the Medical Field:** There is no 'healthcare' system, only a 'disease care' system with NO SOUND PHILOSOPHICAL foundation of supporting health underlying it. This is largely because Big Pharma co-opted and corrupted the entire medical education system about 100 years ago. Today's doctors have virtually no training about how to build health, it is all about fighting disease which is an illusion/delusion. Disease is the absence of health not some entity that takes over a healthy person and makes them sick. The entire approach is ass-backwards.
5. **Vaccines:** This is part of the failure of the medical field and the takeover by Big Pharma based on the UNPROVEN and largely DISPROVEN and hopelessly-flawed

'GERM THEORY.' Big Pharma, and its bought-and-paid-for so-called independent authorities, have coerced (lobbied and influenced) governments to ram aggressive, dangerous vaccination programs down the throats of those they are supposed to be protecting. Contrary to what these shills for Big Pharma, including Mainstream Media are paid to 'report,' vaccines have NEVER been proven to be EITHER safe or effective. They have, however, been proven to seriously alter the way the immune system functions and responds to microbial threats when needed. i.e., While vaccines may provide some temporary protection from a given microorganism, they weaken and distort the function of the immune system to all other microbial exposures.

6. **Malnutrition:** Our entire agricultural & food production industries have been corrupted for DECADES. We have become dependent on foods that have been largely stripped of the vital nutrients they are supposed to contain. They are grown in demineralized/devitalized soils with just a few chemicals added to increase yields. These poor excuses for food are then over-processed to further strip them of their nutritional value while attempting to make them more palatable and profitable. The masses gobble them up and wonder why they feel miserable most of the time.
7. **Extreme EMF (Electro Magnetic Field) Stress & Pollution:** Just as there was a 'natural' state of clean air & water before we mucked it up, there was a 'natural' electromagnetic frequency associated with the planet and all of life. Manmade EMFs pollute and distort the natural EMF of both the planet and the billions of organisms that evolved in the Earth's natural Electro Magnetic Field. As with any pollutant, there comes a time when the organisms subjected to it can no longer function properly. **EMFs and 5G** have been extremely well-documented to cause GREAT harm to all living things studied (plants, insects, and animals, including humans). The Telecom giants have funded bad studies to muddy the waters, thereby allowing their bought-and-paid-for representatives in government and various organizations (that should be sounding the alarm and protecting us) to allow manmade EMFs and 5G to continue unabated wreaking huge damage to all living things for the sake of their profits.
8. **Microbes:** One of the things that humans have yet to comprehend is that we are but one tiny part of a much larger and more complex ecosystem AND that we are likely not the ones calling the shots (although we're pretty good at screwing things up). There are over 100 times the number of microbial cells living in and on us than there are human cells. There is more microbial 'biomass' on the planet than there is animal biomass (including human) by a factor of well over a thousand. Yet somehow, we continue to delude ourselves into thinking that it's all about us! This is utterly mindboggling in my humble opinion. The point is that various microbes live in and on us and part of their role is to exploit our weaknesses for their benefit while also serving important roles in our own health. We're just getting a glimpse of this as we begin to understand the 'Microbiome' that inhabits our ENTIRE bodies (not just our GI tracts) and there's a whole lot more that we don't understand. Do you realize that between 10-30% of our DNA is viral DNA? That approx. 15% is Bacterial DNA and another 15% is Fungal DNA? We live in a sea of microorganisms AND we are simply a part of that

sea. Our feeble attempts to fight and control those microbes, given our extremely limited understanding of them, borders on comical. A healthy, properly functioning body and immune system will do a far better job than we ever will.

There are certainly additional factors involved but these are the highlights in my opinion. Now let's take a quick look at which of them has a 'temporal relationship' to what's going on with this 'pandemic, 'plandemic,' or 'scamdemic' as the case may be.

Every one of the above has been steadily increasing in severity over the past several decades but which ones have radically increased over the past several years and/or months?

1. **Aggressive vaccination campaigns and accompanying propaganda have been greatly accelerated over the past several years.**
  - a. There is substantial data that supports the conclusion that **vaccines are neither safe nor effective** AND that, although they may in fact provide some benefit for a specific microbe, **they completely disrupt the immune system's ability to respond** to other microbes leading to unforeseen harm when a person is naturally exposed to other microbes (which is inevitable).
  - b. The Anti-Vaxer movement has been 'supposedly' discredited and is constantly being ridiculed by the 'powers that be.' Note that ridicule is one of the main tactics used when science and logic don't support the perspective of the powers that be. Also note that the SCIENCE does not discredit the Anti-Vaxers AT ALL, it supports them, however, what is publicized by the Mainstream Media indicates the opposite. Note Well that the Mainstream Media is largely controlled by Big Pharma and depends on it for a MAJOR portion of its advertising revenue.
  - c. This whole thing is very emotionally charged due to the false and misleading info presented by the medical profession who are either brainwashed by, or bought and paid for sales reps for, Big Pharma. The pro-vaxers truly believe the lies they are being told about vaccine safety and efficacy. The data is very clear to the contrary. Sadly, the major organizations who are supposed to be safeguarding the public's health are more concerned with funding from Big Pharma and the vaccine manufacturers than being objective and protecting the people.
2. **There has been a dramatic increase in EMF pollution over the past several years and the addition of a MAJOR new level of EMF pollution over the past several MONTHS.**
  - a. The documented SCIENCE regarding the biological harm caused by manmade EMF is irrefutable for anyone reviewing it objectively. IT JUST IS. Yes, there are some conflicting studies that show no harm, HOWEVER, it is obvious that those studies are both paid for by the Telecom industry AND are seriously flawed. Those studies were done to sow doubt and give regulatory agencies 'plausible deniability' to take on a 'let's wait and see' attitude rather than doing their duties and

protecting the public. See Martin Pall's excellent review of the published studies for an in-depth understanding of this issue.

- b. The NEW EMF stress that has likely pushed many with compromised health over the edge is 5G. No, I'm not saying that 5G caused SARS-CoV-2 BUT I am saying that 5G is a MAJOR contributing factor to the morbidity & mortality of those that have been designated to have Covid-19 regardless of whether or not any of their illness is related to the virus. Why else would so many now be designated as Covid-19 related deaths when they have tested NEGATIVE for SARS-CoV-2? SOMETHING is undermining and compromising their BODY'S ability to utilize oxygen and it does not present as a typical viral pneumonia. 5G disrupts normal cellular function via several documented mechanism. AND there is extensive documentation that 5G (60 Gigahertz) strongly interacts with OXYGEN thereby altering the oxygen molecule. This is from the Telecom industry's own technical publications. Amazingly, NO ONE asked whether that might be harmful to biological organisms that RELY on OXYGEN. OXYGEN absorbs 98% of the energy put out by 5G transmitters at 60 Gigahertz per industry publications. Might that have some negative impact on organisms in the immediate vicinity that require oxygen for life? Golly gee, duh, maybe...

My final point as to the cause of this Pandemic/Plandemic is as follows. I do not accept or believe that this Pandemic/Plandemic was caused by a 'novel' corona virus at all for a variety of reasons.

1. The testing is completely inadequate and imprecise to make such a diagnosis and determination. The well-respected Nobel Laureate scientist that developed the test that the current testing is based on (PCR aka Polymerase Chain Reaction) has stated since its inception that PCR cannot be used to make a diagnosis! Kary Mullis, PhD, is the scientist.
2. The newer data indicates that SARS-CoV-2, although only 'discovered and named' in Dec. 2019, has likely been among us for decades. There are millions of viruses among us that have yet to be 'discovered and identified.'
3. The way the numbers are being categorized is an abomination of any semblance of objective science. The number of people infected has likely been multiplied by 2-3 times or more. The number of deaths attributed to Covid-19 is virtually a COMPLETE and total fabrication. Whether done intentionally or simply due to a series of assumptions based on erroneous conclusions, the reality is that there are really NO verified deaths due to Covid-19.
4. The rush to find the cause, or I should say, scapegoat, was head-spinning. This has been done before and has dramatically skewed our understanding of numerous diseases. In fact, Fauci (he really doesn't deserve to be referred to as Dr.) has used this exact playbook before in the case of HIV and AIDS. Most of the world still believes that fabrication.

5. The presentation of the 'illness' does not fit that of a viral pneumonia. The illness, in a small percentage of those who progress with severe symptoms, presents as OXYGEN starvation. This is much more like high altitude sickness than viral pneumonia. This also helps to explain why the long-standing approaches to treating viral pneumonia cause even more deaths.
6. 5G operates at 60 gigahertz, the exact frequency that maximally interacts with and ALTERS the oxygen molecule. There is a VERY high correlation between the hardest hit areas and previous rollout of 5G technology. Additionally, most large hospitals are hot spots for very high amounts of harmful EMF exposure including 5G. This is likely one of the reasons that so many people who are sensitive to high levels of EMF pollution destabilized so rapidly when taken to the hospital.
7. 5G has been documented to alter the Earth's Schumann Resonance leading to damaging effects on all biological organisms. This includes causing hypertension and anxiety those more susceptible to depressed or altered Schumann Resonances.
8. EMF in general, and 5G in particular, have been documented to negatively impact the function of ALL cells via multiple known mechanisms including but not limited to alteration and disruptions of the Voltage-Gated Calcium, Sodium, Potassium, and Chloride Channels in the cell membranes! Alterations in mineral levels and relationships impacts hundreds of additional cellular and biochemical functions since minerals regulate enzyme function.
9. As for the response: There is ZERO sound data to support the practices of wearing masks or social distancing. At best these are ways to make people believe that they are doing their part to help fight this false foe. At worst, they are part of the MINDF\*CK being perpetrated on the masses as part of their training to do whatever the 'AUTHORITIES' tell them to do.

Based on all of the above, I respectfully request that we all WAKE the FU\*K UP, take our heads out of our collective AS\*ES and throw the bums that are supposed to be protecting us and our health in prison out of their current positions, out of office, and, as appropriate, in prison. It's time to take back control of our lives, health, and destiny. Become a part of the solution. Do some research, ask the right questions, look at the actual data vs listening to the spin doctors BS lies. Reach out to like-minded individuals. Organize and take action. Start today.

I have been holding off publishing my findings and opinions due to fear of reprisal from one or more of the 'powers that be' that are controlling the narrative for a variety of reasons. After serious consideration, I've chosen to move forward and get this perspective out. There are now at least a handful of others leaning in the same direction as to the real cause of this pandemic/plandemic/scamdemic.

I was afraid that if I openly challenged the prevailing narrative, they'd silence me very quickly one way or another. Having previously been in the cross-hairs and knowing what 'they'

are capable of, made me very hesitant. These people have NO CONSCIENCES and I assumed that I would be targeted and either locked up on some fabricated charge or terminated. That's how the powers at that level play, we're talking trillions of dollars in potential profits as well as major power & control. But what the hell, better to go down fighting than sit back and watch as they continue their diabolical plans to further enslave humanity.

\*Note re Event 201 - A Global Pandemic Exercise that was held in NYC in October 2019. The event was 'sponsored by' The Bill and Melinda Gates Foundation, The World Economic Forum, and John's Hopkins University's Center for Health Security. You can learn all about it online. It is eerily consistent with what we have seen play out thus far. Combine this 'circumstantial evidence' with potential motives and you'll possibly start to see why calling this a 'plandemic' makes sense.

\*\*Who might benefit, and therefore might propagate misinformation, from all of this whether it is really a Pandemic (or Plandemic)?

1. **The Telecom industry** as it provides a huge 'Red Herring' to throw people off the 5G connection. So, their role is simple, they are, in my opinion, one of the major underlying causes. They are contributing to massive numbers of health problems and deaths yet can continue rolling out their insane assault on all biological organisms while making obscene amounts of money with impunity. Their response would also be very predictable. They would say very little if anything, yet behind the scenes, they will use their considerable resources to censor anyone making a connection between EMF & 5G and the pandemic. That is definitely happening as hundreds of posts and videos are disappearing whenever there is mention of 5G along with coronavirus.
2. **Big Pharma**, particularly the Vaccine manufacturers, since pandemics create huge opportunities and profits for them. Ultimately, they will push for and likely get legislation for mandatory testing and vaccinations making trillions of dollars from all of this and further damaging and killing millions of unsuspecting people. Dozens of well-documented books have been written about the ugly truth about Big Pharma.
3. **The Banking Industry** as they will be called on to bail the world out of the huge economic mess that the mishandling of this has caused. They make a fortune by creating 'money' out of nothing and lending it out and collecting the principle and interest on the fictitious currency. The more wasteful spending and debt, the more money they make. The history of the banking cartel is very dark but beyond the scope of what is appropriate to get into here. Suffice it to say that they thrive during times of economic disasters and waste. This is all just business as usual for them. See the *Creature from Jekyll Island* by Ed Griffin for a fascinating explanation of the Federal Reserve. Other books are available about the horrors perpetrated by the IMF and World Bank.
4. The very organizations that are bringing you this debacle will also benefit greatly due to increased funding, power, and oversight responsibilities. Big Government (every country that is playing along), the WHO - World Health Organization (75% of its funding comes from VACCINE manufacturers), the CDCs - Centers for Disease

Control of the various countries that are playing along, a variety of so-called scientific regulatory organizations such as the FDA, FCC, ICNIRP - International Commission on Non-Ionizing Radiation Protection, etc. so they can continue to exist as cover for the industries that support them and profit from their deceitful practices. Once again, there are many well-documented reports of the ongoing crimes and collusion of these organizations with Big Pharma, the Telecom Industry, and others.

5. Finally, the 'Masters of the Planet' as they find ways to increase their control over an unsuspecting, completely distracted populace regardless of whether they ultimately are responsible for the circumstances or are just taking advantage of them. This Pandemic/Plandemic will serve to help them gain even more control over the public via programs of mandatory testing, vaccination, and surveillance as well as moving us closer to a one-world digital currency which makes it far easier to control us.

Keep your head buried in the sand or elsewhere at your own peril. Trust the recognized 'authorities' at the expense of your own and your family's health and freedom.

We DO NOT live in a free society any longer. We DO NOT operate under real Capitalism any longer. We are not, and never have been a Democracy, we were set up as a Democratic Republic. Benjamin Franklin stated this when asked what form of government they had come up with following the Constitutional Convention "A Democratic Republic, if you can keep it." Sadly, "We The People" dropped the ball generations ago but just haven't realized it yet. Perhaps ONE good thing that may come from this mess of a Plandemic. Hopefully, it will cause enough people to wake up and take action to wrestle back the reins and control of a government and its puppet masters. The real power of our Constitution is that it is SUPPOSED TO BE about "We The People." Any objective observer would clearly see that this is no longer the case. Sadly, we've spat on the immortal words of Lincoln who expounded upon this at the close of his Gettysburg Address when he said "...that we here highly resolve that these dead shall not have died in vain - that this nation, under God, shall have a new birth of freedom - and that government of the people, by the people, for the people, shall not perish from the earth." I'm saddened to say that 'That Ship Has Sailed.' Now we have to see if we can get it back, who's with me?
